RE: Docket 2013-275-WS Proposed Increase for Utilities Inc.

To whom it may concern:

Utilities Inc. has historically charged higher rates than any other utility provider in the area for over thirty years. They are not providing us, their captive customers, with any additional or enhanced services and are not providing us with superior service.

We have no alternative but to purchase water service from their company, yet our repeated requests to modify their outrageous charges are denied.

They should not receive any type of increase for any reason.

Respectfully,

Tammy Ulmer
